SHOPFITTING

”

Shopline Shopfitting is a Shopfitting and Design company under the Cevizoglu Group. Established in 1991, Cevizoğlu Mağazacılık is a shopfitting company serving the retail industry. Doing business with passion and enthusiasm, Cevizoğlu executes projects and implements on schedule with over 200 personnel including professional design, project management, production and own installation team.

With over 28 years of experience in shopfitting with wood and metal manufacturing capabilities in an integrated 13,750sqm facility, Cevizoğlu has the ability to ship products worldwide from its 2500sqm warehouse that's a 3-hour-flight distance to over 60 countries.

Our Objectives

Shopline is a modular retail equipment system with an easy, standardized way. Also with the new custom-built design software, it allows customers to design their stores in the shortest time with a little effort. After this, customers have their modular products in the shortest time from our stocks. Thanks to its modularity, Shopline systems and display stands are delivered disassembled with minimum size. All units have assembly diagrams and videos so our customers install them without requiring professional support.

OUR GOAL**

MESH SYSTEM

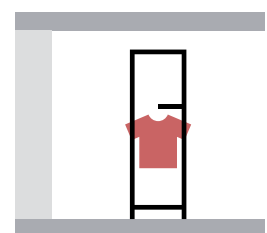

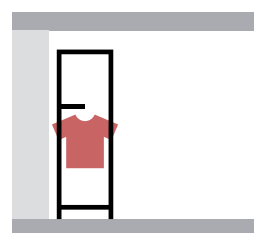

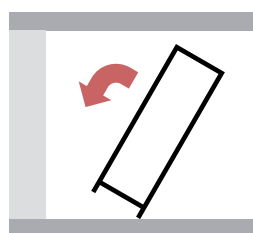

WALL SYSTEMS

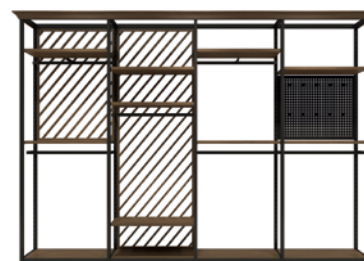

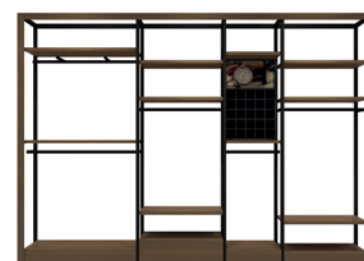

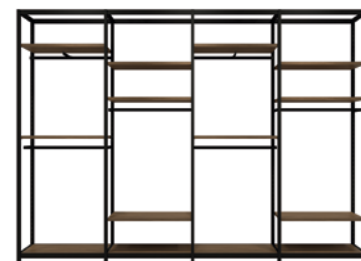

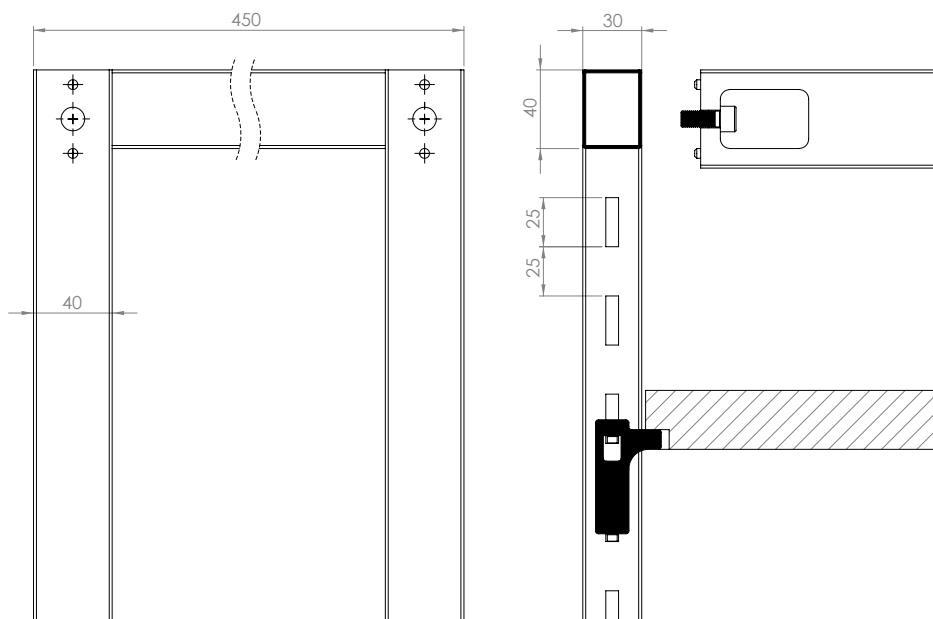

Mesh System is a modular and self-standing store wall system created with frames and connectors. Mesh system allows you to create a 3D depth of space in your store. You can create excellent designs for your walls with the metal frame system. Since it is a freestanding wall system, it not only enables you to differentiate your concept but also provides alternative solutions by giving you opportunities to display your products in the middle of the store.

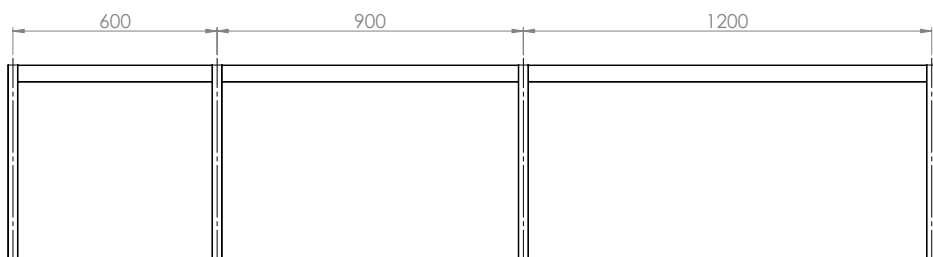

Use this QR code to get more detailed information about the system and the installation video.

Mesh System, is a freestanding frame system which consists of 30x40 mm profile frames and 50x20 mm profile connectors.

We usually use this system placed in front of walls but of course you can use it as a center unit.

FIX
SYSTEM

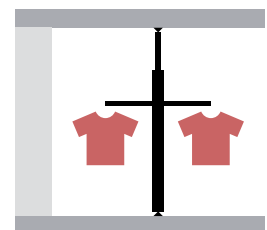

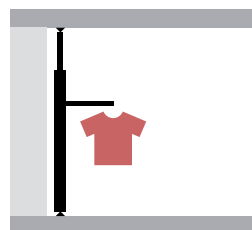

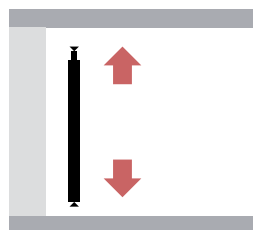

WALL SYSTEMS

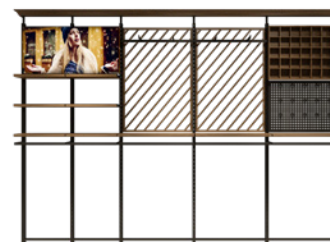

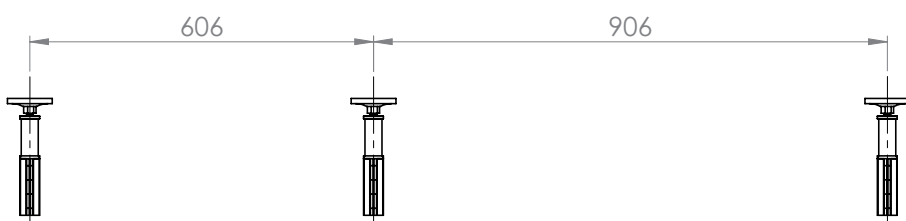

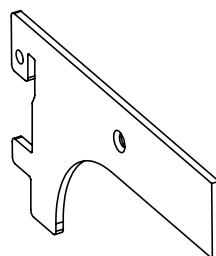

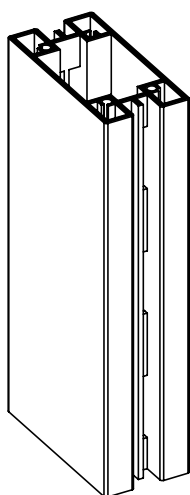

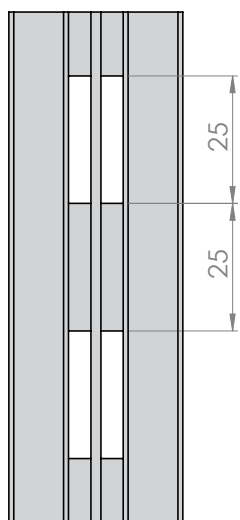

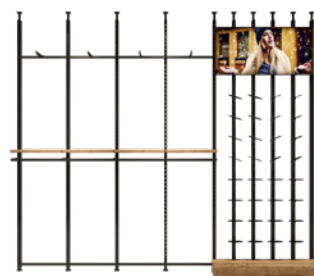

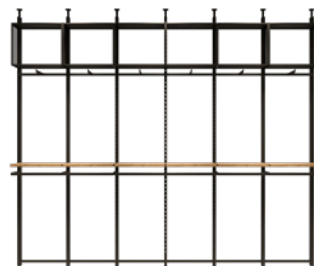

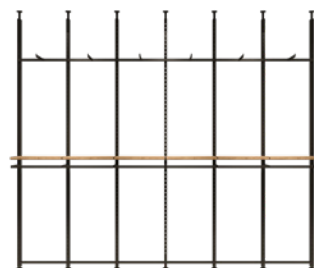

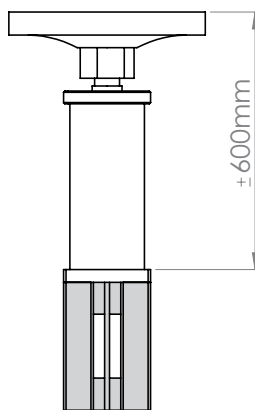

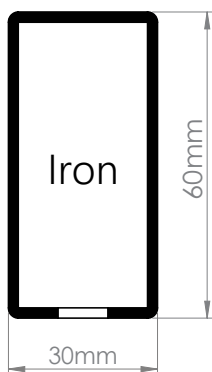

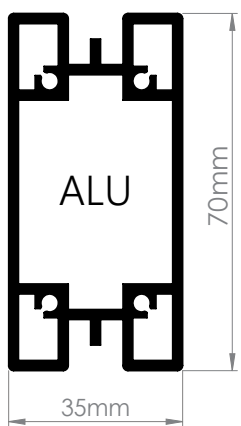

Fix system is a wall system consists of aluminum or iron uprights that can be height-adjusted. Fix System provides flexible solutions to your decoration needs thanks to its height-adjustable mechanism. Being independent of the back walls since the uprights are easily fixed to the floor and ceiling, the Fix system enables you to create more authentic designs. Moreover, it can be used as dividers in the middle of the stores as well as separators in front of the fitting rooms.

Use this QR code to get more detailed information about the system and the installation video.

The image shows a wall-mounted storage system. At the top, a large rectangular panel with a grid of small holes is mounted. Several hooks are attached to this panel. Below the panel, there are four horizontal shelves of varying lengths, supported by vertical brackets. A small, round, woven basket sits on the top shelf. The background wall has a textured, stone-like appearance. The entire image is overlaid with a semi-transparent yellow filter.

BASIC

SYSTEM

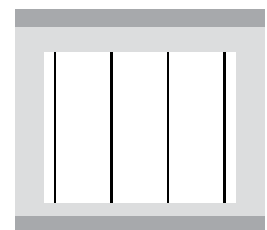

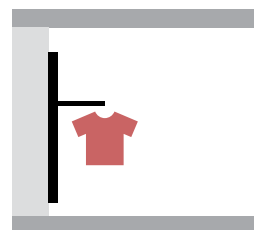

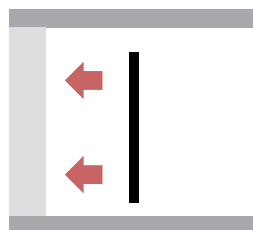

WALL SYSTEMS

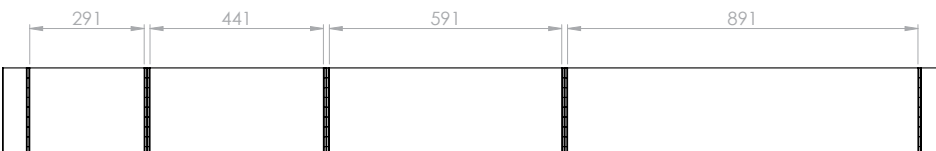

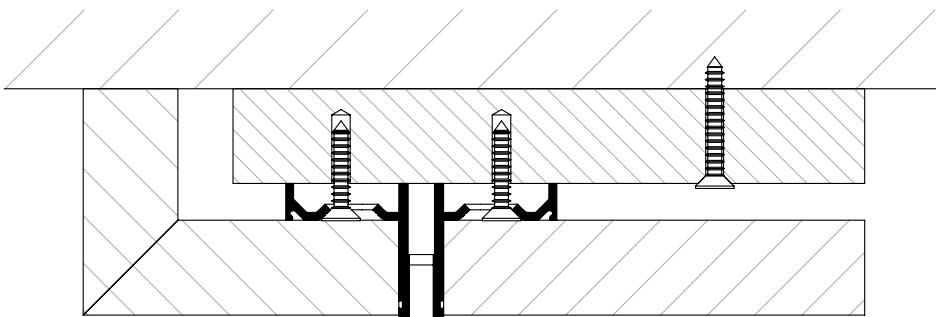

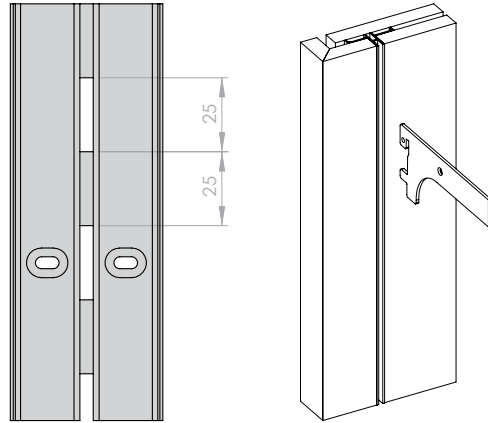

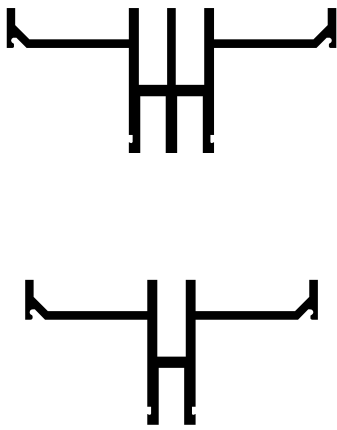

Basic System is an aluminum upright wall system with various decorative panel options. It is a wall system that can be used with 60 cm or 90 cm width panels. Shelves, hangers, front hangers, accessories display boxes, displays for ties and belts, illuminated visuals, storage boxes, and drawers can easily be used with the Basic System. You can display your products aesthetically with different color options.

Use this QR code to get more detailed information about the system and the installation video.

Create Solution for Your Business

SHOPLINE SHOPFITTING SHOWROOM

Concept for Stores

Shopline created a standard, elegant, easy-to-assemble, modular, aesthetic and affordable shopfitting collection including wall units, display stands, cash desk, fitting rooms and all other accessories and components necessary to create a retail atmosphere. Thanks to its modularity, ShopLine systems and stands are delivered in flat packs. All products have assembly diagrams and videos so that customers can easily install them without requiring any professional support. Moreover, ShopDesigner, the 3D shop design software created and developed by Shopline, permits 3D designs of any store with the minimum effort within a few hours.

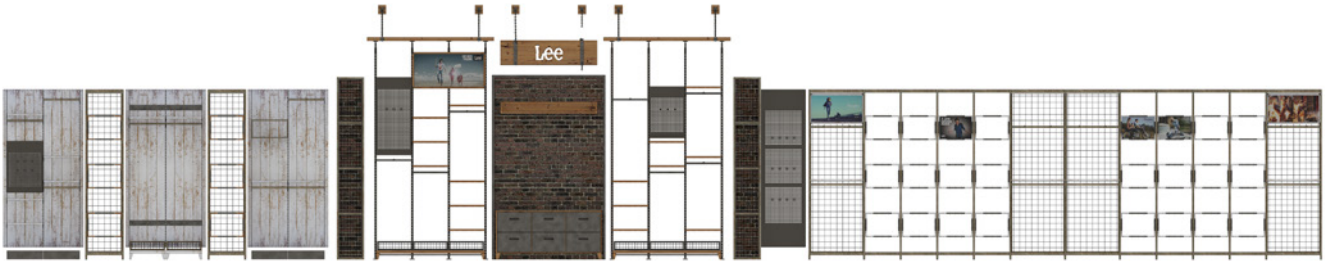

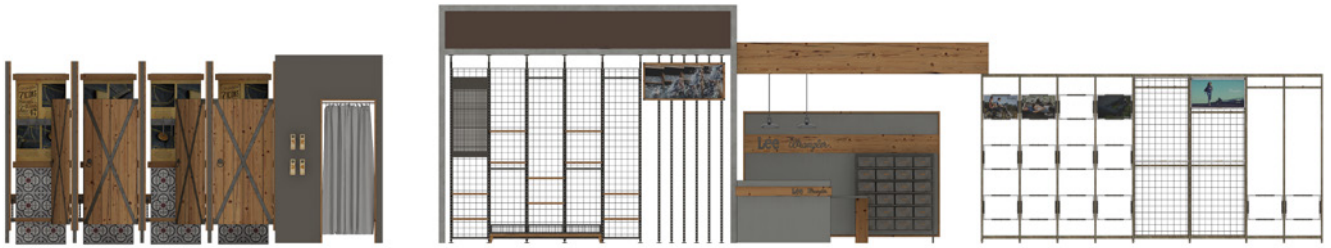

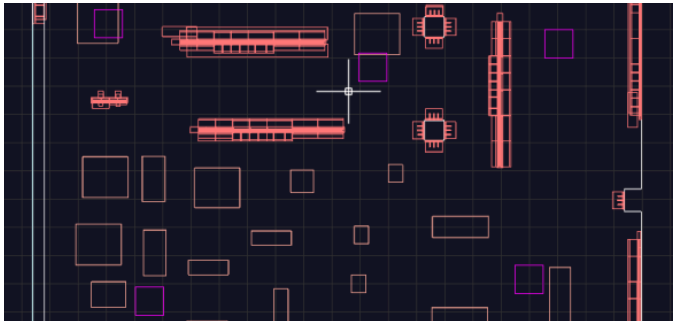

Designs & Concept

Rich design library for every Shopline system makes it easier to communicate and share ideas with our customer. They won't need to imagine how will it look when it's done thanks to our photorealistic visuals.

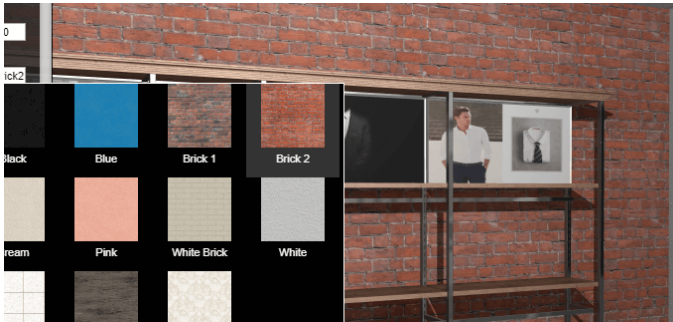

Designs & Application

Concepts that are created after perceiving the customer's goal are another part of our reliable services, which always guarantee results with realistic presentation techniques.

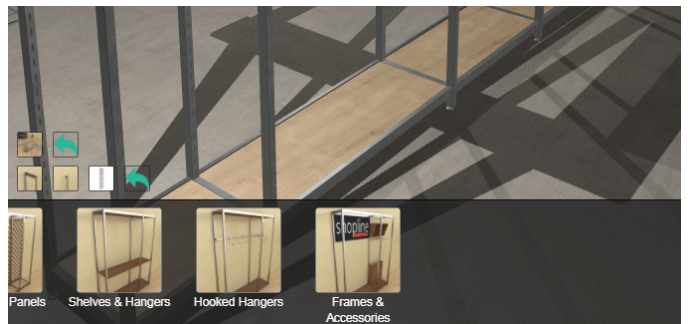

In Shop Designer, you can easily draw plans and create both 2D and 3D images of your store structure at the same time.

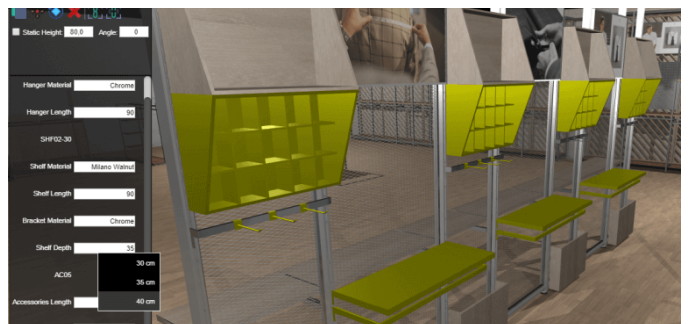

When in the 3D scene, you can use any of the wall and floor covering or materials that are already in the library or try the ones you have installed yourself. You are free to adjust the lighting as you wish as well.

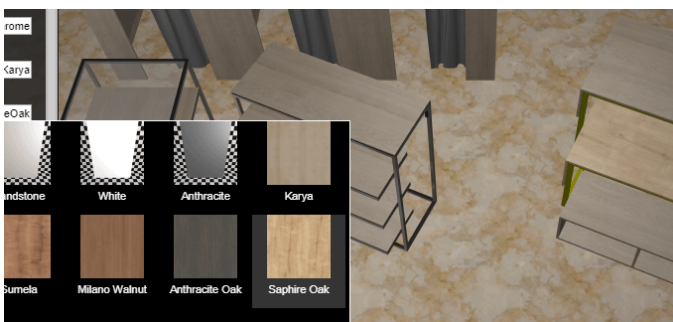

You can design your store using Shoplevel's categorized products. It is possible for you to obtain the desired image for your store by using variations available even though all products are standardized.

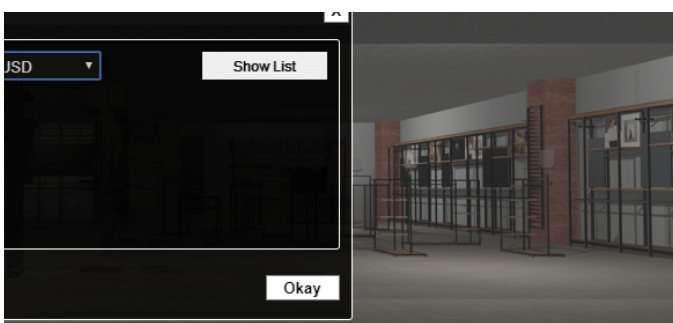

You can easily place the profiles, shelves, hangers, and other accessories in the right positions. Shop Designer knows which elements can be installed on which products and can guide you.

Display stands are standardized; however, it is possible to optimize the units with your desired choice of metal and wood coatings and finishes. There are wider options available for some of the display units and cash counters.

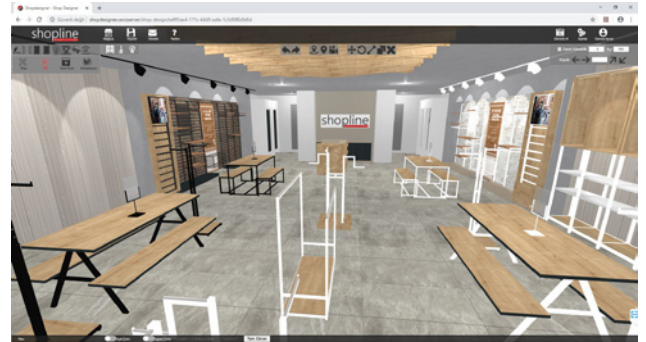

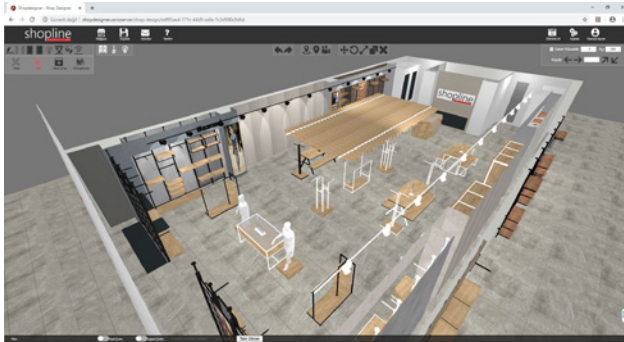

Once you have designed and furnished your store with Shoplevel products, you can obtain the cost of each product in a price list provided by Shop Designer. Then, it is possible for you to revise your design to achieve the most suitable budget.

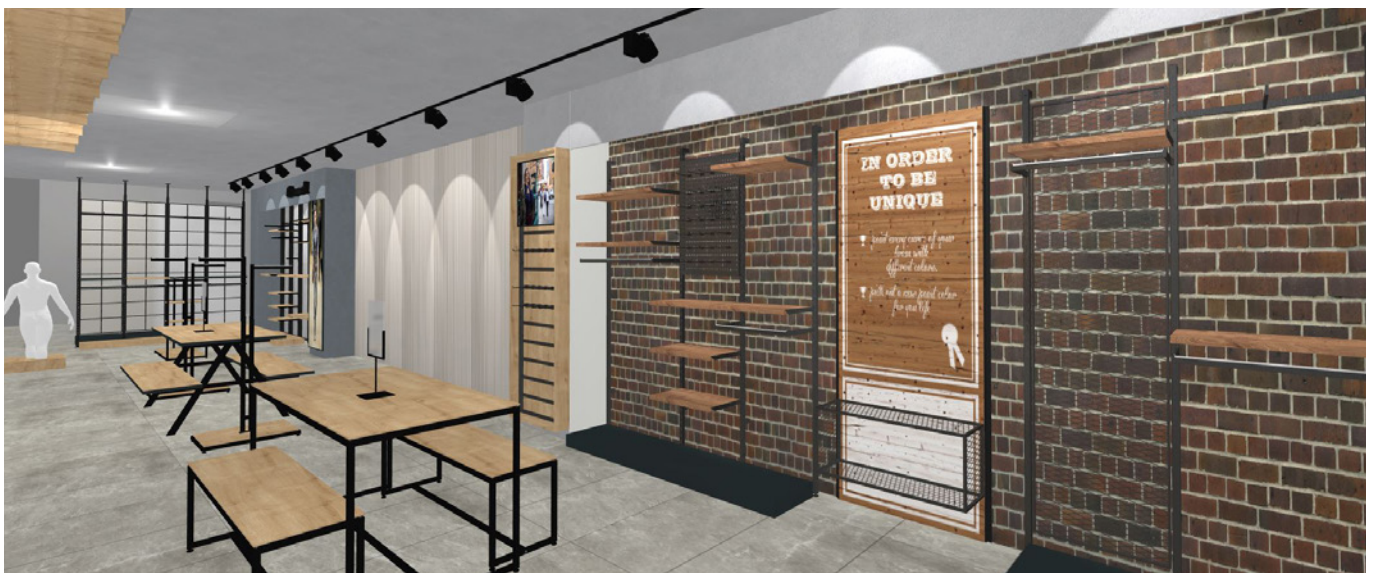

Shop Designer

One of Shoptline's biggest advantages is our custom built software Shop Designer™. You won't need any modelling skills or high-end softwares to prepare designs or quotations to your customers.

- Simple 2D CAD style layout drawing.
- 3D navigation screen.
- All Shoptline units, display stands, systems, shelves, equipments are in the library.
- Drag and drop unit placement from library with thumbnails.
- Snap placement for units. This way you can't place objects on to wrong slots.
- Color/material selections for units, walls and grounds.
- Custom texture import option.
- Screenshot utility.
- One click quotation and ability to export Excel file.
